Introduction

The Town of Cary and Cary Chamber of Commerce are interested in the success of your new business and want to partner with you and help you navigate through the process. You may encounter things along the path to opening a business that will be unexpected, so when it comes to working with the Town, we want to help you understand each step before you get started. Whether you plan to operate your business from your home or a storefront, it is important to familiarize yourself with the Town of Cary regulations.

Home-Based Businesses

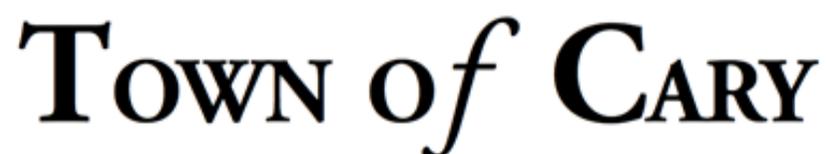

Most home-based businesses are permitted in all residential zoning districts within the Town of Cary and may not necessarily require any permits. Generally, if you are having customers/clients come to your home or you have an employee working in your home who does not reside there, an Accessory Use Permit from the Town of Cary is required for your home occupation. If you have any questions on starting a home occupation, please contact Cary's Development Customer Service at (919) 469-4046.

Storefront Businesses

If you are planning to operate your business from a storefront, we encourage you to review this guide thoroughly prior to signing a lease or purchasing property for your new business!

Development Liaison Service

As an added benefit to our business community, the Town now offers a Development Liaison service to help you successfully navigate the development and permitting process. Cary's Development Liaison program primarily focuses on business customers. This service is completely voluntary and you are not required to participate. If you choose to participate, the Development Liaisons would assist by serving as your primary point of contact with the Town throughout the life of your project. Cary's Development Liaisons have over 50 years of combined experience in planning, zoning, permitting, building code, construction and inspections.

Zoning & Land Use

Step 1: Verify Your Zoning & Land Use

The first step is to ensure the proposed location of your business has the appropriate land use and zoning designations for the type of business you plan to open. The Town has a Land Use Plan which outlines the community's future vision for growth and development in terms of where residential, office and commercial uses can be located. The zoning districts provide appropriately located areas consistent with the Land Use Plan for a full range of residential, office, commercial, and industrial uses. If you are not sure how your business is classified per Cary's zoning [Land Development Ordinance \(LDO\)](#) or the State Building Code, we recommend you to contact a Town Development Liaison at (919) 469-4046. Once it is determined that the zoning district allows the use, you need to check the use-specific standards outlined in Chapter 5 of Cary's Land Development Ordinance (LDO) to determine if there are any other specific limitations to consider. Uses in each zoning district are either permitted, not permitted or permitted only with an approved Special Use permit.

To find out if your proposed business is permitted with the existing zoning and land use designations, you can visit Cary's [Virtual Interactive Planner \(VIP\)](#) and search property information. Properties can be searched by the parent parcel address, Real Estate Identification (REID) or Property Identification Number (PIN). Additionally, you may contact the Town at (919) 469-4046. If you find the zoning is not consistent with your use, you may request to rezone the property or look for another location in Cary that meets your business needs.

The following infographic depicts the zoning districts usually associated with small business uses.

Typical zoning districts consistent with small business uses include:

Office and Institutional District (OI)

The OI district provides for the development of professional or medical offices and community institutions.

General Commercial District (GC)

The GC district generally provides for uses that provide goods and services to residents of the community.

Office/Research and Development District (ORD)

The ORD district provides for a wide range of employment generating office, institutional, research and development, light manufacturing and "flex space" uses.

Industrial District (I)

The I district provides for light and heavy industrial activities such as manufacturing, warehousing and wholesaling activities with limited contact with the general public, but may generate heavy traffic.

Town Center District (TC)

The TC district provides for a variety of subdistricts that permit non-residential uses including High Intensity Mixed Use (HMXD), Mixed Use (MXD), Office/Institutional (OFC/INS), Office/Industrial (OFC/IND), Commercial (COM), Commercial Low Intensity (CLI), Cottage Business and Residential (CB&R) and Institutional (INS).

Planned Development District (PDD)

The PDD district provides for a mixture of uses with innovative design and layout. PDD's may contain a mixture of residential and non-residential uses. Information on Cary's PDD's, including permitted uses, conditions and approved land use plans can be found by visiting our [Virtual Interactive Planner](#).

Mixed Use District (MXD)

The MXD district is only located within Mixed Use Overlay Districts (MUOD). MXD provides flexibility for a mixture of commercial, office and residential uses subject to specific requirements set forth in a Preliminary Development Plan (PDP) or Site Plan.

Building Classification

Step 2: Verify Your Building Classification

Once you determine that the location you are interested in has the appropriate land use and zoning designations for the type of business you plan to open, the next step is to find out if the building you want to house your business in will require renovations to meet the building safety standards set by the [North Carolina State Building Code](#). The Building Code was established by the State to create minimum building requirements to safeguard the public health, safety and general welfare.

While it is not required, it is recommended that you work with an architect or contractor to assist in determining whether the space you wish to operate your business out of already meets these minimum requirements and if not, the renovations required to bring the building up to code.

Public health, safety and general welfare standards are maintained through the proper use of building materials, by regulating the size and the height of buildings, by ensuring a minimum number of exits and limiting the maximum distance one would have to travel to safely exit the building in an emergency and by determining when a sprinkler system or fire alarm system is required. The Building Code also sets the minimum requirements for lighting, ventilation, number and type of plumbing fixtures, (i.e. bathrooms, water fountains) and energy conservation measures.

Many of the minimum requirements in the building code are based on the type of business that will occupy a building. The Building Code refers to this as the occupancy classification(s) of the business. Once the occupancy classification is determined, the other portions of the code can be applied. An infographic of the most common occupancy classification groups can be found on page seven.

Occupancy Classification Groups

Assembly Group A

Spaces (a building structure or portion thereof) used for the gathering of persons for purposes such as civic, social, religious, recreation or for the consumption of food or drink. Examples include theaters, restaurants, churches, martial arts studios, dance halls or sporting areas.

Business Group B

Spaces (a building structure or portion thereof) used for office, professional or service transaction or the storage of record and accounts. Examples include banks, beauty shops, dry cleaners, laboratories and professional offices.

Educational Group E

Spaces (a building structure or portion thereof) intended for educational purposes of 6 or more persons up to the 12th grade.

Factory Group F

Spaces (a building structure or portion thereof) used for assembling, disassembling, fabricating, finishing, manufacturing, packaging, repairing or processing operations.

Institutional Group I

Spaces (a building structure or portion thereof) in which people are cared for or live in a supervised environment, having physical limitations, because of health or age are harbored for medical treatment or other care or treatment. Examples include assisted living facilities, convalescent facilities, group homes and social rehabilitation facilities.

Mercantile Group M

Spaces (a building structure or portion thereof) used for the display and sale of merchandise and involves stocks of goods or merchandise accessible to the public. Examples include department stores, drug stores, motor fuel-dispensing facilities and sales rooms.

Residential Group R

Spaces (a building structure or portion thereof) used for sleeping purposes but not one or two family dwellings. Examples include boarding houses, hotels, apartments, dorms, live/work units and other residential care facilities.

Storage Group S

Spaces (a building structure or portion thereof) used for storage that is not classified as a hazardous occupancy.

Utility Group U

Building or structures not classified as any specific occupancy. Examples include agricultural buildings, carports, grain silos, private garages, retaining walls, sheds, tanks and towers.

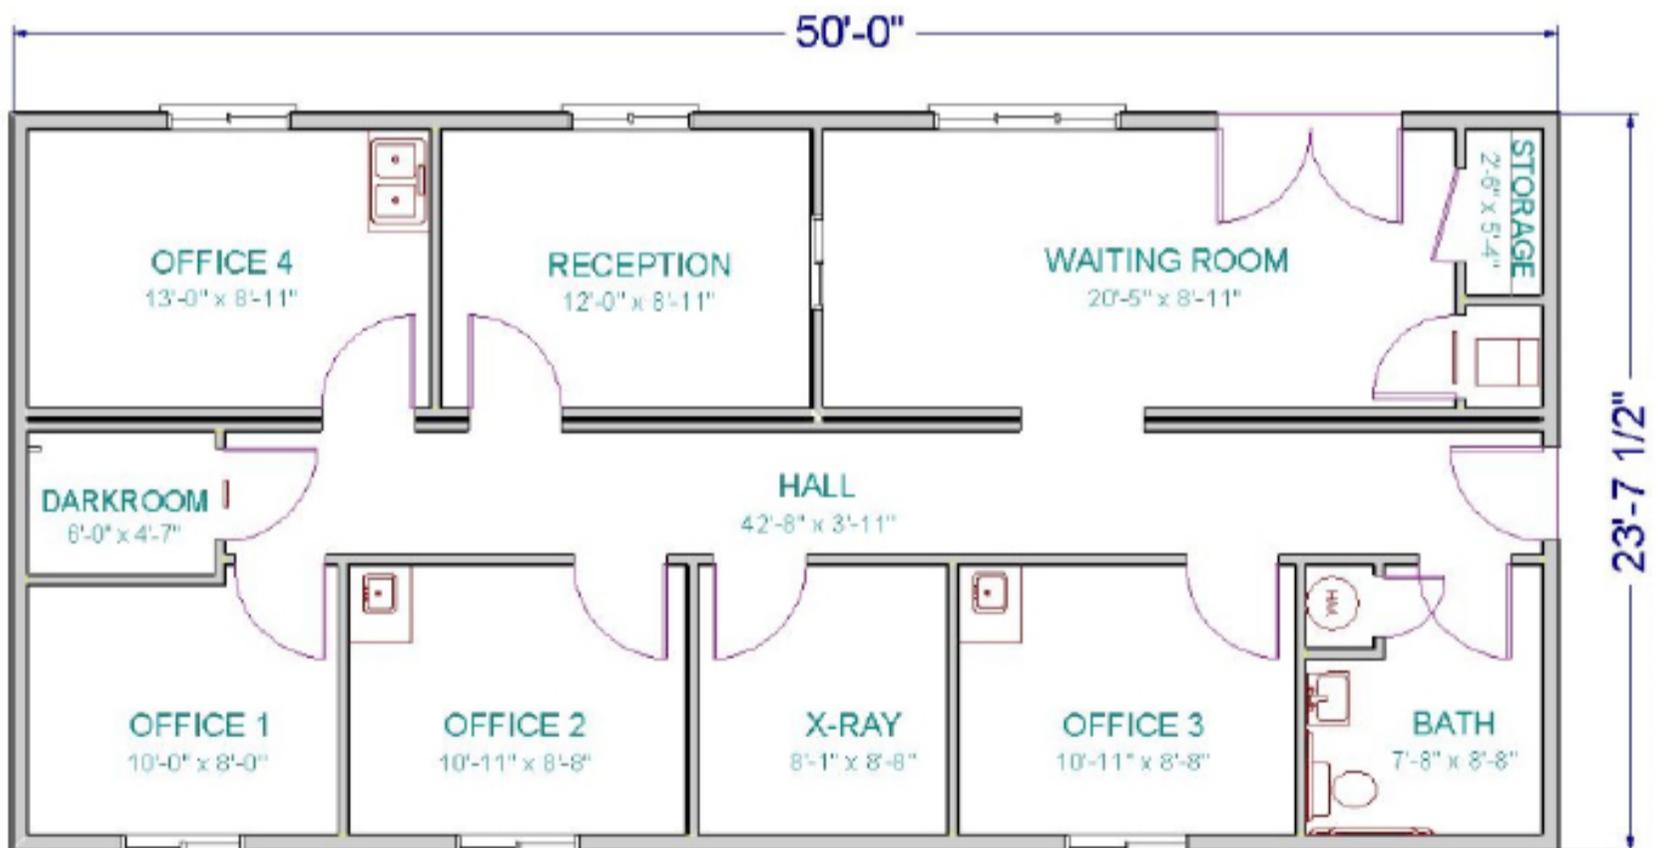

Building Permits

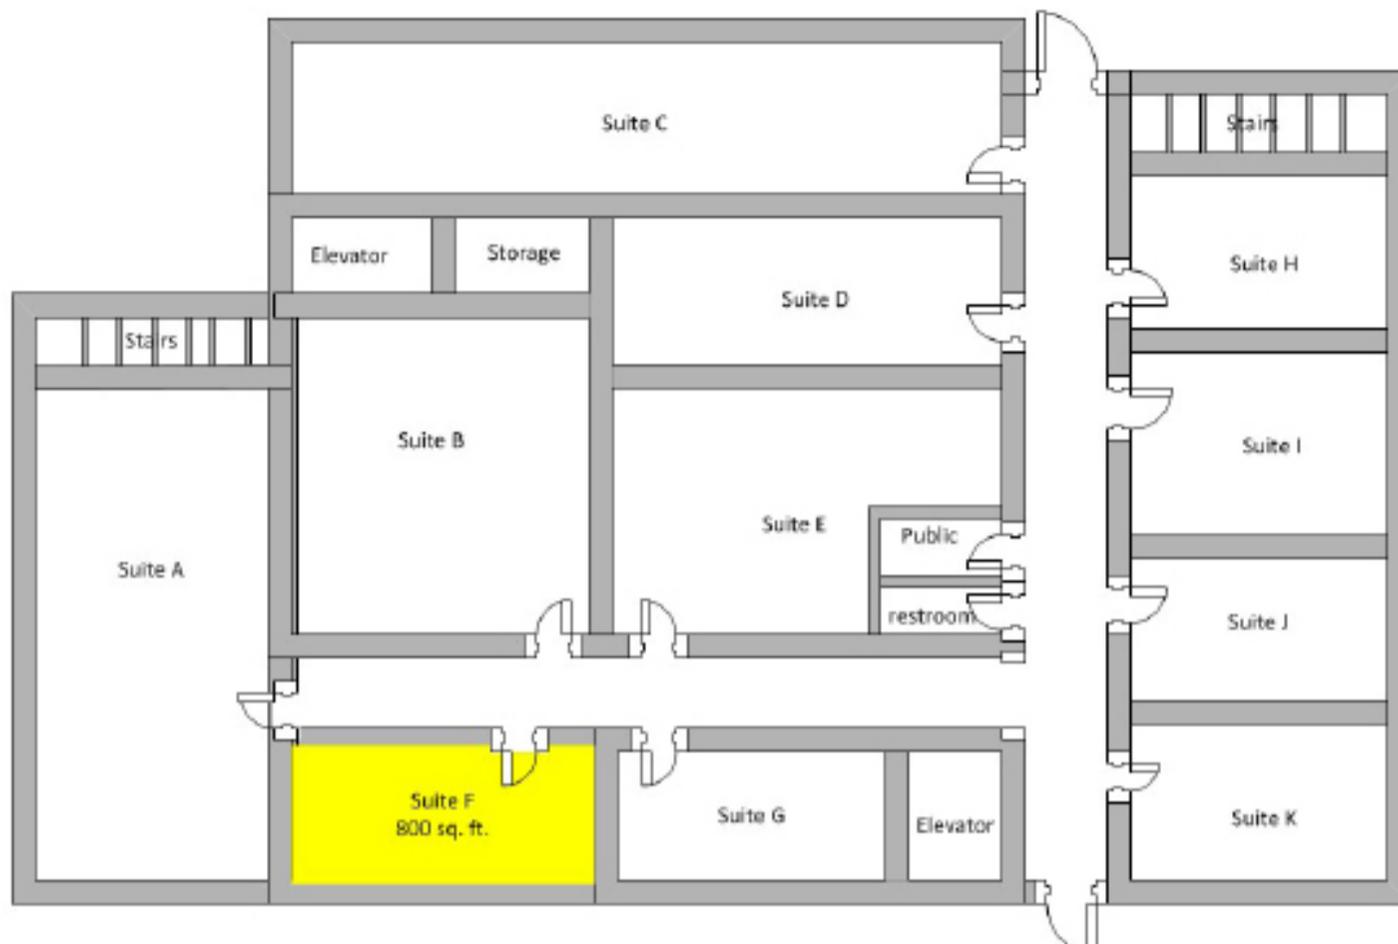

Step 3: Applying for a Building Permit

A permit from the Town of Cary is required anytime a new tenant moves into a space or if any plumbing, electrical, mechanical, sprinkler, fire alarm or structural changes are made to the building. In cases where a new tenant moves into a space, these permits are classified as either a change of tenant (moving into a space that was previously permitted for the same building occupancy type, such as Business to Business) or a change of occupancy (moving into a space that was previously approved for a different building code occupancy type, such as from a Business use to an Educational use). As part of the application process, you will need to submit both a layout of your proposed floor plan and a key plan (see samples below). Please use these graphics for key plan and site plan.

Sample Floor Plan

Sample Key Plan

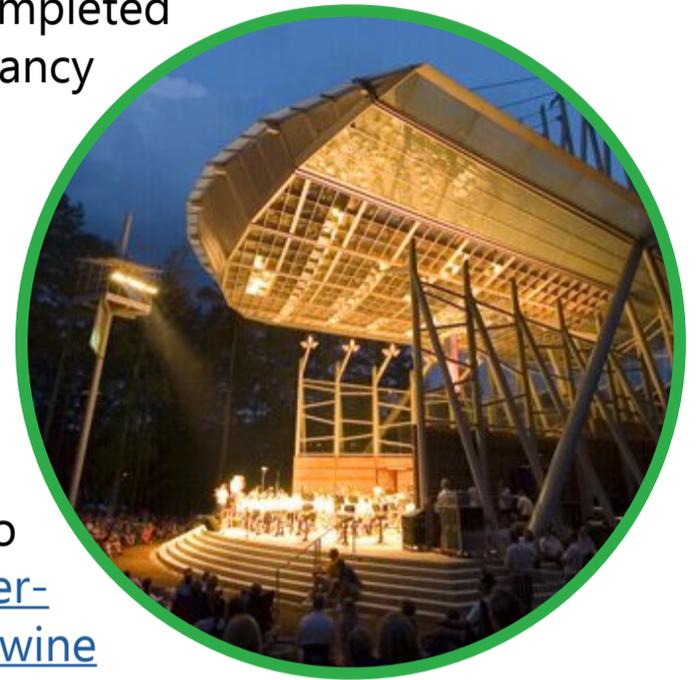

Businesses that are changing occupancy types (i.e. Business to Mercantile) will also need to complete either a [2012 Building Code Summary](#), or in some cases, an [abbreviated version](#) of the Building Code Summary. Again, while not necessarily required, we recommend you work with an architect or contractor to assist you in determining the occupancy classification, space layout, occupancy load, exiting requirements and other requirements based upon the new use (occupancy classification). For instance, it is common that certain business uses will require additional improvements such as larger ventilation and/or exhaust systems, a fire alarm, additional plumbing fixtures, and if you are opening a food service business the approval of [fats, oils and grease](#) systems. Your architect or general contractor should be familiar with the State Building Code requirements and offer advice with options and the costs associated with these improvements. In addition, a change of occupancy to a more intense use may trigger unanticipated costs such as development fees. It is recommended that you contact the Town at (919) 469-4046 to determine if your proposed business would require development fees.

Your [Commercial Building Permit Application](#), including floor plan, key plan and a building code summary, can be submitted to the Development Customer Service counter on the first floor of Town Hall. Once reviewed and approved, you will receive an email informing you (or your contractor) that your permit is ready to be picked up. This email will outline the [fees](#) (including development fees, if applicable) associated with your approved application. If the building you are moving into requires improvements, you must pay for and pick up your building permit before you begin the work. At the appropriate times during the renovation, it will be necessary for the Town to inspect the progress to verify compliance with the Building Code. You can schedule inspections online, or by calling (919) 469-4046. Once the improvements are completed and approved, you will receive a Certificate of Occupancy (CO) or Certificate of Completion (CC) from the Town.

Note: Additional Licensing or Permitting Agencies for Consideration

In conjunction with or in addition to your Building Permit, other permits, approvals or licenses may be required to start your business. For example, if your business serves alcohol (even temporarily), you will need to obtain a permit from the North Carolina [Alcoholic Beverage Control Commission](#) and a Town of Cary [beer and wine permit](#). Food establishments require a [Food Service Establishment Plan Review Application](#) through the Wake County Environmental Services with the exception that bakeries, frozen ice cream and yogurt, poultry and dairy businesses require [NC Department of Agriculture](#) approval. The Town's Utilities Department will need to make a [grease interceptor determination](#) during the building permit process. If you have questions you can check with your design professional (architect or engineer), contractor or contact a Town Development Liaison at (919) 469-4046.

Making Changes or Additions to the Building Façade or Property's Exterior?

If there are any improvements to the outside of the building (other than signage), you will likely need to receive Town approval for a [Minor Alteration](#) or other approval to the site. Minor Alterations are required when you change the exterior color or material of a building, relocate windows, doors, dumpsters, landscaping or anything else external to the building. Prior to proposing any changes to the inside or outside of the building, contact the Town at (919) 469-4046 to determine what approvals, if any, are necessary.

Signing a Lease

Step 4: Signing Your Lease

Steps 1-3 (above) outline some of the due diligence that the Town recommends you complete before you sign a lease. Before entering into a contract for a property, it is important to verify that the land use and zoning allow your type of business, and what alterations or repairs will be necessary for the building to meet the minimum requirements of the State Building Code.

Step 5: Establishing a Utility Account

Unless your utilities will be handled through the landlord or management company, you will need to establish services for the property. The Town of Cary provides water, sewer and in some cases solid waste and recycling. To establish these services you can contact the Town's Finance Department at (919) 469-4050. Other utility services provided for the property will also need to be established with the appropriate utility providers. For example, electric service is primarily provided by [Duke Energy](#) and can be contacted by calling (919) 781-2851. Gas service is primarily provided by [PSNC Energy](#) and can be contacted by calling (877) 776-2427.

Step 6: Getting Your Signs

Whether or not you choose to design and install a sign, you will want to familiarize yourself with the Town of Cary sign regulations. Many forms of advertising, such as wind-blown devices, pennants, sign spinners, etc. are prohibited in the Town. Prior to purchasing a sign or other form of on-site advertising, it is recommended you contact the Town of Cary at (919) 469-4046. The Town of Cary issues permits for two types of permitted signs; temporary and permanent.

Temporary signs are only permitted for a maximum of 30 days and are issued within the first 60 days of the issuance of the Building Permit, Certificate of Occupancy (CO) or Certificate of Completion (CC). Some businesses choose to use a portion of the 30 days to advertise "Coming Soon" and the remainder of the 30 days for "Now Open", while other businesses may choose to use all 30 days to say "Grand Opening" or "Now Open". The Town of Cary does not regulate the content of the sign, but does regulate the size and duration of time. Temporary signs are governed by Chapter 9B of Cary's [Land Development Ordinance \(LDO\)](#) and require approval of a [Temporary Sign Permit](#).

Permanent signs are regulated by Chapter 9A of Cary's [Land Development Ordinance \(LDO\)](#) and consist of a wide range of signage types, such as wall, ground, awning, directory, suspended, monument, identification, etc. Permanent signs require an approved [Sign Permit application](#) and some permanent signs require a [building permit](#) to accompany the sign permit. Electric signs that have internal wiring or lighting equipment, and external lighting equipment that directs light on signs, require an [electrical permit](#). It is highly recommended that you hire a professional sign contractor to help you design, construct and install your permanent sign(s). Questions regarding permanent signs should be directed to a professional sign contractor or the Town of Cary Planning Department (919) 469-4046.

Many non-residential developments in the Town of Cary have Master Sign Plans (formerly known as Uniform Sign Plans), which outline the overall design, number and location for all signs within that development. You can download a copy of the Master Sign Plan at your business location (if applicable) by searching the property on Cary's Virtual Interactive Planner (VIP) or search by alphabetical listing by project name.

Ready to Open

Step 7: Ready to Open

There are many ways to celebrate your opening including a grand opening event. Events such as grand openings may be approved by the Town through the [Temporary Use Permit](#) process. These permits are good for a maximum of 7 calendar days or 3 events per year, whichever is less. The Temporary Use Permit allows you to place temporary structures such as tables, tents, bounce houses, signs, etc. on the property. If you have any questions on ways to help market your new business within the Town's regulations, please contact the Town at (919) 460-4046.

What people have been saying about the Town of Cary's Development Liaison Services

"My team utilized the Town of Cary's Development Liaison Services for our most recent Tijuana Flats in the Town of Cary. Not only did they help guide us through the Town's requirements and processes, they served as our point of contact for any questions or concerns we had throughout our build-out. **I wish more jurisdictions provided these services**, it certainly would make it easier for new businesses to open their doors."

Dominic DeVuyst, Tijuana Flats

"**We found the DLS invaluable** in the whirlwind process of getting our College Nannies and Tutors Learning Center up and running. We went from finding the space to opening our doors in less than two months, and that involved all kinds of questions and interactions with the town. The DLS helped us identify and jump through all the hurdles and provided very clear and helpful information."

Greg Tarsa, College Nannies and Tutors

"Development Liaison Service was instrumental in the opening of our restaurant. We had never done business in the Town of Cary and came to them with numerous questions. Everything from ABC Permitting to Zoning and everything in between. DLS provided prompt and thorough responses or introduced me to the correct department at the Town to find the answer. **I could not have asked for a better resource!**"

Brad Barbour, Shuckin' Shack Oyster Bar

"The Town of Cary Development Liaison service was **extremely helpful** in guiding our school through the permit and application process. Every email, phone call, and meeting was informative and answered our questions and assisted us in getting everything done to help us set up in Cary."

Lissy Wood, Wake Academy

"The Town of Cary Development Liaison Service was extremely helpful with helping to start Pharmacy Bottle + Beverage. **They were a great resource** to turn to when I had questions navigating the process of opening my small business in Downtown Cary."

Tyler Watt, Pharmacy Bottle & Beverage
